

BSSLED Lighting Design Terms and Conditions

01/04/2017

General

1.1 - The lighting design service provided by BSSLED limited is a non-contractual agreement/service

1.2 - All Designs are carried out using information provided to us. BSSLED Ltd will not be held responsible if incorrect information is provided to us which effects the lighting design

1.3 - Schemes will be designed to meet levels stated within BS EN 12464 or equivalent standards for a particular area/activity, unless otherwise requested

1.4 - Lighting designs assume an ambient temperature of 25 degrees Celsius unless otherwise stated

1.5 - It is the responsibility of the recipient/client to check the designs meet any specific requirements of the project and that any inaccuracies are brought the attention of the designer before orders are placed.

1.6 – Maintenance factors, surface reflective properties and working planes will be assumed in line with British standards unless advised otherwise.

1.7 – This document is supplementary to our standard terms and conditions

Energy saving calculations

2.1 – When an energy saving calculation is provided, these will be completely based on information provided to us and our experience. It is unlikely we will have full details of all parameters and therefore any results will be indicative.

Emergency Lighting

3.1- Emergency lighting plans will be provided in compliance with BS 5266-1, -7 & -8 and will be subject to conforming to employer's risk assessment. It is necessary to review the risk assessments to ensure all 'points of emphasis' are covered. All designs are limited to this information.

3.2- Emergency lighting plans are offered on an "suggested use" basis and all designs must be checked by relevant consultants before orders are placed
